 CRA Assessments

Simulate · Evaluate · Remediate

GreenLight Clinical partners with CRA Assessments to evaluate and enhance CRA monitoring quality (June 2022)

Clinical Research Associates (CRAs) play a crucial role in the monitoring oversight of clinical trials by helping to ensure site regulatory and protocol compliance, subject safety and welfare, and data quality and integrity. Therefore, the ability to objectively evaluate the skills-based, core monitoring competency of CRA staff and then to develop suitable remediation strategies to address areas of deficiency is imperative for ensuring the monitoring quality of clinical trials around the globe.

To achieve this goal and to preserve a commitment to quality, **GreenLight Clinical** has partnered with **CRA Assessments**, a company that has worked with large CROs and Pharmaceutical companies, to utilize their suite of products aimed at delivering improved CRA performance. By doing so, **GreenLight Clinical** is now armed with a full-circle, objective approach to consistently evaluate, remediate, and re-evaluate the skills-based, monitoring competency of their CRA staff.

GreenLight Clinical**, is a full-service, physician-run CRO specializing in Ophthalmology, Oncology, & Rare Disease. People are at the center of everything we do. We value our patients, our teams, our clients & our profession. We focus on delivering consistent results quickly. This helps bring medical services from bench to bedside faster. We support medical, medicinal and device advancements that make the world a better and safer place. **Transforming lives, one trial at a time.

Contact Eliana R. Burke at Eliana.burke@greenlightclinical.com to learn how our solutions can benefit your organization.

***CRA Assessments, LLC**, an Austin, Texas-based company focused on monitoring quality, offers validated, web-based site monitoring visit simulations, targeted core-monitoring training modules, companion follow-up simulations, and comprehensive analytics to enhance an organization's ability to evaluate the core monitoring competencies of CRAs in a skills-based manner, and to remediate deficiencies across their entire CRA population. Our solutions are cost-effective, easily accessible 24/7 around the globe, consistent, and objective – and have been used to evaluate over 6,500 CRAs across approximately 70 countries.*
